

Silhouette Story

Time: 1-2 Classes

Grades: 1-3

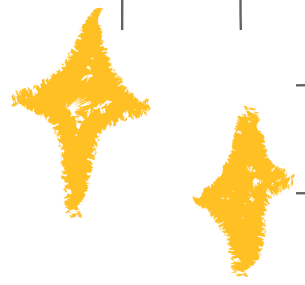

Materials

- White 8.5" x 11" art paper
- Black construction paper scraps
- Scissors
- Glue sticks
- Crayons, markers or paints for background
- Optional: small objects/toys for casting shadows

Process:

- Create the Silhouette Shape
- Have students trace around a small object or toy onto black construction paper OR draw a silhouette freehand.
- Cut out the shape carefully.
- Place on the white paper, but don't glue it on yet.
- Design the Silhouette
- Use crayons, markers or paints to create the rest of the picture around the silhouette.
- The scene should "tell the story" of the silhouette.
- Place the Shadow
- Glue the black silhouette onto the background
- Add Details
- Encourage students to add background elements, color boldly, and fill the page.

tips for Success

- Show a few examples so students can see how the silhouette can be part of a bigger scene.
- Remind them that silhouettes are always solid black—no details inside.
- Encourage creativity: the silhouette can become part of something real or something imaginary.
